 Powerpoint

description

We understand that every organization is unique, which is why we work with teams, individuals, and organizations to provide a customized training experience that meets your specific needs.

Our expert trainers use the latest and most powerful learning techniques, such as gamification and Training from the Back of the Room (TBR), to ensure that participants gain maximum and long-lasting learning. Our comprehensive training approach covers a range of domains, including:

- ▶ Agile methodologies and frameworks such as Scrum and Kanban
- ▶ Agile Foundations for grasping fundamental concepts, starting with values and principles, and continuing into why business agility is crucial for companies
- ▶ Product Management and Product Ownership for delving into feature prioritization, value determination, and discovering ways that product teams can maximize profitability and product value in an agile world
- ▶ OKR Framework for understanding goal setting across an entire organization and ensuring proper alignment between departments and teams
- ▶ Agile Leadership for employing leaders with adaptation skills that help lead their teams and companies to success, as well as an understanding of new leadership ideas and practices that fit in a rapidly changing VUCA (volatile, uncertain, complex, ambiguous) world

Participation in our Agile Trainings is the first step towards understanding and implementing organizational agility. Our goal is to deliver an international level of quality training to participants and keep their training experience special and engaging with effective and enjoyable applications

motivations

Enhanced collaboration and communication: Agile emphasizes frequent communication, teamwork, and collaboration. In our agile trainings, we help teams work together better, communicate more effectively, and build stronger relationships.

Increased productivity and efficiency: Agile promotes continuous improvement and places a greater emphasis on providing value quickly and frequently. In our trainings, we deliver concrete practices and examples that can be used to streamline processes, eliminate waste, and improve efficiency.

Improved product quality: Agile frameworks lay the groundwork for teams to analyze and adjust their work, ensuring that they meet customer needs and deliver high-quality products. In Product Ownership training, we offer the most effective ways to prioritize features, mitigate risks, and deliver value to customers.

Better alignment between departments and teams: The OKR framework helps teams collaborate toward a shared vision. Our OKR training teaches how to apply OKRs and align around common objectives effectively, achieving greater synergy between departments.

Stronger leadership skills: Agile leadership training assists organizations in adapting to a changing business landscape, learning new leadership concepts and approaches, and empowering teams to generate value quickly and efficiently. With Agile Leadership training, leaders can improve their skills to effectively

lead their team, create a culture of continuous improvement and innovation, empowering and motivating their teams to deliver value faster along the process.

deliverables

- ▶ Highly interactive and engaging training sessions that promote co-creation and maximum learning (techniques used: gamification, TBR, liberating structures, gamestorming)
- ▶ Course materials and content provided at the end of each training
- ▶ A certification for participation
- ▶ Access to an expert trainer for follow-up questions
